A Perfect Fit

Custom Designed tailors your home to suit your taste—and lifestyle

Steven Goffman,
owner of Custom Designed

Nothing fits better than something that's been custom designed exclusively for you. And that's not just true for clothing. Think of how fabulous your home would look with a custom-tailored interior.

Wouldn't it be great to have an entertainment center that would efficiently and elegantly contain all your home electronics? Or cabinets that stylishly stash your Cuisinart and china? How about an ultra-efficient home office or a knockout kitchen island?

From closet organizers to built-in entertainment units, custom home offices to kitchen cabinetry (and more), Steven Goffman and his team at Custom Designed create home interiors and accessories to perfectly fit your look and your lifestyle.

If you're not exactly sure what you're looking for, Goffman can provide expert design advice, as well as an excellent idea of what the finished product will look like. A sample kitchen and photos of finished projects are also on display in Goffman's showroom.

But Goffman has an even better idea...

"Since everything we do is local, I can bring people to a lot of homes to see our work," Goffman says. "They can actually talk to the customer if they're available."

One customer, Carolyn E. of Montclair, has this to say: "Steven and his team deliver an excellent quality product. They give you choices to make sure you achieve the look you want, within your budget. Steven is accessible at all hours, so for busy working profes-

sionals, this is incredibly helpful, knowing you can text him at 11pm and get an answer."

Goffman uses wood ranging from maple to mahogany, to craft everything from radiator covers to countertops. "We do all kinds of countertops," he notes. "We just did a bamboo countertop, which really looked drop-dead gorgeous."

Custom closets are a customer favorite. No matter what the closet size, Goffman can find creative ways to increase your storage space. "We custom fit everything, so you can get exactly what you want," he says. "And it doesn't necessarily make it any more expensive." To create a great look at an affordable price, Goffman often custom-cuts organizers to fit your space... within your budget.

"Once my old closet was redesigned, built and installed, it looked so beautiful, I had to go and buy a whole new wardrobe," says customer Maria B.

Goffman often receives profuse praise like that from clients, thanks to the quality and service his company provides. And no matter how big or small the job, customer service is always priority one.

"You see me every step of the way throughout the project," he says. "If there's an issue, or a question, or a problem, I'm there."

When it's over, his clients attest, all that's left for him to hear is praise for a job incredibly well done. ▲
